

Scoring Rubric - Practice Computational Artifact (File Formats)

Reporting Category	Task	Scoring Criteria	Decision Rules	Points Received	Comments
Row 1 File Format Stated	COMP. ARTIFACT #1	Clearly identifies the file format discussed for the Performance Task.	Do NOT award a point if any one of the following is true: <ul style="list-style-type: none"> the artifact is not a computational artifact the artifact does not clearly identify the file format 	0	
Row 2 Development Process of File Format	COMP. ARTIFACT #2	The artifact illustrates, represents, or explains the file format's intended purpose, function, or effect.	Do NOT award a point if any one of the following is true: <ul style="list-style-type: none"> the artifact is not a computational artifact the artifact does not clearly identify the file format the artifact only illustrates a feature of the file format and not its intended purpose, function, or effect. the artifact does not illustrate, represent, or explain the file format's intended purpose, function, or effect. 	0	
Row 3 Comparison to Other File Formats	COMP. ARTIFACT #3	Clearly names "competitor" file formats	Do NOT award a point if any one of the following is true: <ul style="list-style-type: none"> the artifact is not a computational artifact the artifact does not clearly identify the file format the artifact does not list any names of other competitor forms 	0	
Row 4 Evidence of "Best File Format"	COMP. ARTIFACT #4	Clearly states why their selected file format is the "best" above the others.	Do NOT award a point if any one of the following is true: <ul style="list-style-type: none"> the artifact is not a computational artifact the artifact does not clearly identify the file format the artifact does not give any evidence as to why their chosen file format is "best" the artifact is missing words "best" or synonyms thereof in stating why their file format is "best" 	0	
Row 5 Finding and Evaluating Information	REFERENCES	At least 3 different references are listed.	Do NOT award a point if any one of the following is true: <ul style="list-style-type: none"> the artifact is not a computational artifact the artifact does not clearly identify the file format the artifact contains less than two references 	0	
TOTAL POINTS EARNED:				0
