

Final Reflection - Maya Room Scene (Senior Edition)

Autodesk Maya
Color Mode: RGB

Seniors this is it! Your final Artist Statement for me (I can hear you celebrating now!). This will be divided into two paragraphs (so you might need two slides). 1st Paragraph - Describe the room you designed and why you picked this room for your final project. Describe multiple features in your room that you knew you had to be included and why. What types of shapes AND modeling tools did you use in creating some of these items? Name (1) challenge you came across and how you solved it. 2nd Paragraph - This is reflection of your time here at Colony (sorry it's time to get sentimental). How do you feel you have grown as a person at Colony? What are you most scared/fearful of when graduating in the next few days? Lastly, for an incoming freshman coming into Colony, what is the #1 piece of advice you would give that person and why. You are welcome to include any other final thoughts you wish to express.
